Information

Dev name: moath alluqmani

Dev No: 0594840383

**Dev Email : moathalluqmani@gmail.com**

Dev major: Computer Science

Dev GitHub repo Link : https://github.com/moathallqumani/Project-One-Phase-Two.git

Project Name: Learner Academy

Phase Two Project one

Sprint

Since 3 weeks determined to do the prototype as it shows in the chart each sprint had one week duration.

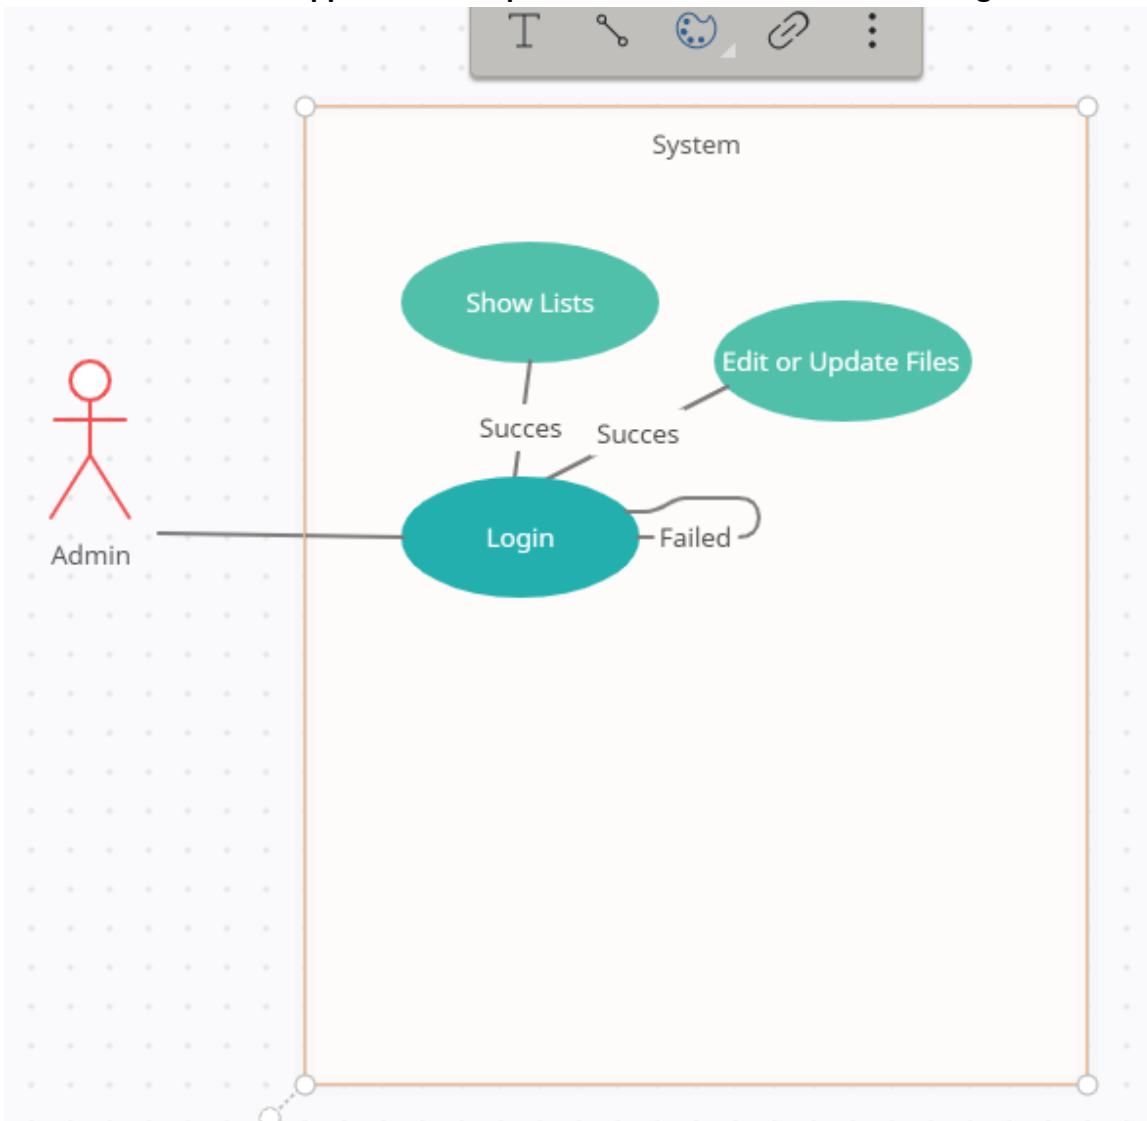

Three weeks divided into 3 different sprints (Document, Design, Implant) each one of them had different processes
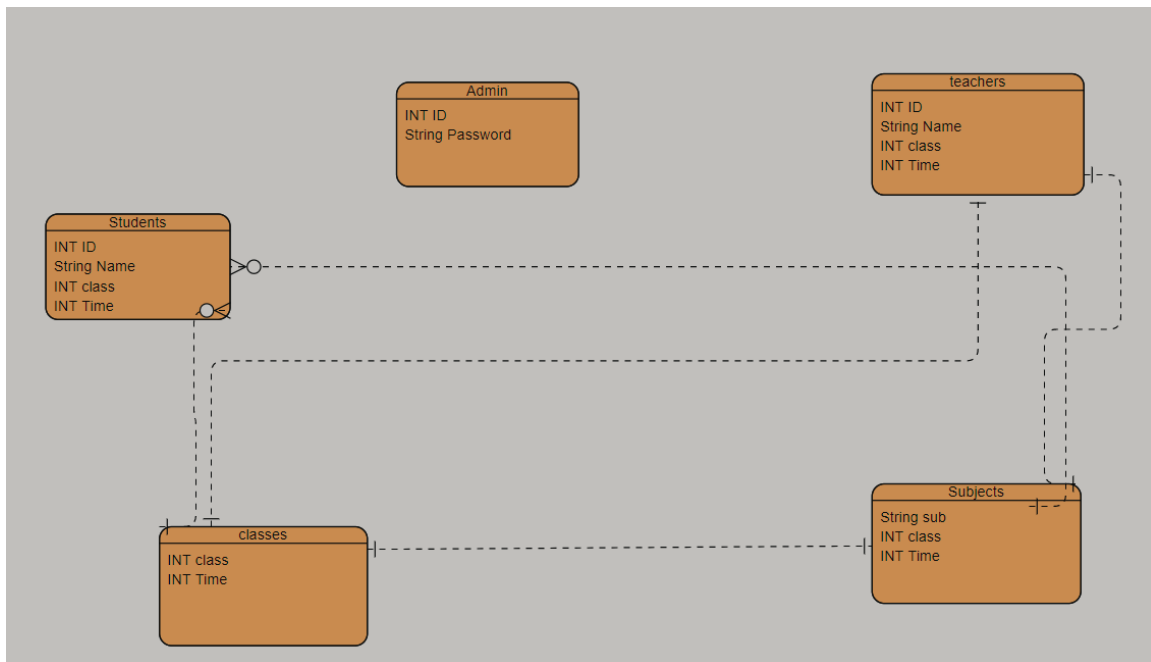

Product Capability

This product will make an easy display of the information and editing the information of the academy datas

User interactions

All of interactions happened in this product showed in this use case diagram

ER diagram

Appearance

The program will appear on web browser in pages form

Data Structure And Algorithm

There is not much data structure used in this program or algorithm because there no sort or search or even store data it straight forward program

What makes it good?

- **This program will make the display of academy data more ease**
- **Multi-Function**
- **Secure**
- **Easy to use.**
- **Maintain**
